

# OUR STORY

**1993**

## FOUNDED

A-Laser was founded in Beaverton, OR to serve as partners for local engineers in the Silicon Forest technology region.

We started by utilizing our laser experience to process and cut SMT Stencils for the Electronics Assembly industry.

**2004**

## MERGED

FCT Assembly acquired A-Laser and expanded our customer network, technical knowledge, and laser capabilities to support other markets and industries in the area.

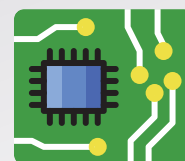

**2010**

## MOVED

We moved our facility to Milpitas, CA to become a local laser cutting partner for the Silicon Valley region.

This was a strategic location to support engineers on all different types of R&D projects.

**2015**

## CAPABILITIES

Our experienced engineers and CAD team utilized 10 lasers and 2 Optical Inspection Systems all within an ESD safe facility.

**NOW**

A-Laser continues to innovate, grow, and explore new technologies including 3D printing, surface modification, advanced material processing and more.
